INNOVATEX 2026
AI-ENABLED UNDERGRADUATE RESEARCH CHALLENGE

CONCEPT NOTE AND COMPETITION GUIDELINES

I. RATIONALE

Artificial Intelligence (AI) is rapidly transforming Electronics Engineering and related technological fields. From intelligent communication systems and autonomous devices to predictive maintenance, smart energy systems, healthcare technologies, robotics, cybersecurity, environmental monitoring, and Internet of Things (IoT) applications, AI is increasingly becoming an enabling technology for solving complex engineering and societal problems.

As future Electronics Engineers, students must develop not only an understanding of AI technologies but also the ability to integrate them responsibly and meaningfully into engineering research and innovation.

InnovateX 2026 – AI-Enabled Undergraduate Research Challenge provides Bachelor of Science in Electronics Engineering (BSECE) students with a national platform to present research that integrates Artificial Intelligence into innovative systems, technologies, prototypes, models, or engineering solutions.

Building on the InnovateX Research Challenge conducted during the 2025 National Students' Summit, which emphasized applications of AI, IoT, and Machine Learning in addressing real-world problems, InnovateX 2026 strengthens the role of AI by making its substantive application a required component of every research entry. The 2025 competition already encouraged research addressing healthcare, agriculture, manufacturing, energy, environment, education, and smart cities.

For 2026, the competition shall adopt a two-stage national competition structure. Submitted research papers shall first undergo technical screening and evaluation. The highest-ranked qualified entries shall advance to the National Finals, where student researchers shall present and defend their work before a Panel of Judges during the National Students' Summit 2026.

InnovateX 2026 therefore seeks to promote a culture of undergraduate research, AI-enabled innovation, responsible technology development, technical excellence, and evidence-based problem solving among future Electronics Engineers.

II. OBJECTIVES

InnovateX 2026 aims to:

1. promote a strong culture of research and innovation among BSECE students;
2. encourage the development of research-based solutions addressing relevant engineering, industrial, environmental, educational, health, economic, and societal problems;
3. develop students' competencies in the appropriate application of Artificial Intelligence and Machine Learning to Electronics Engineering research;

4. promote the integration of AI with electronics, communications, embedded systems, IoT, robotics, signal processing, instrumentation, automation, and other emerging technologies;
5. strengthen students' competencies in research design, experimentation, data analysis, system development, validation, and technical evaluation;
6. encourage responsible, ethical, transparent, and evidence-based use of Artificial Intelligence;
7. strengthen students' scientific and technical communication, research presentation, and defense skills;
8. provide opportunities for undergraduate researchers to receive feedback from experts from academe, industry, research, and professional practice; and
9. recognize outstanding AI-enabled undergraduate research demonstrating innovation, technical rigor, feasibility, relevance, and potential impact.

III. EXPECTED RESEARCH OUTPUT

Each participating team shall submit a completed or substantially completed undergraduate research project that demonstrates the meaningful application of Artificial Intelligence.
The research may result in one or more of the following:

1. functional prototype;
2. hardware-software integrated system;
3. intelligent IoT system;
4. AI/ML predictive or classification model;
5. intelligent monitoring or decision-support system;
6. embedded or edge-AI application;
7. robotics or autonomous system;
8. signal, image, speech, or data-processing application;
9. simulation or computational model;
10. intelligent communications/networking solution;
11. AI-enabled software or mobile/web application integrated with an engineering problem; or
12. another research-based technological solution consistent with the objectives of InnovateX 2026.

A prototype, simulation, working system, or other demonstrable research output shall be required. The demonstration may be presented either through a pre-recorded video presentation or through a live demonstration during the National Finals.

IV. REQUIRED ARTIFICIAL INTELLIGENCE COMPONENT

A. AI IS A MANDATORY RESEARCH COMPONENT

1. Every InnovateX 2026 entry must demonstrate a substantive application of Artificial Intelligence or Machine Learning as part of the research itself.
2. The AI component must contribute directly to the research methodology, operation, intelligence, analysis, prediction, classification, optimization, decision-making, control, automation, or other essential function of the proposed solution.
3. Acceptable AI applications may include, but are not limited to:

a. machine learning;
b. deep learning;
c. artificial neural networks;
d. computer vision;
e. natural language processing;
f. reinforcement learning;
g. intelligent optimization;
h. anomaly detection;
i. predictive analytics;
j. pattern recognition;
k. intelligent classification or clustering;
l. AI-enabled signal processing;
m. edge AI or TinyML;
n. intelligent control systems;
o. generative AI when technically justified as part of the research system; and
p. hybrid or ensemble AI approaches.

4. The use of AI solely for grammar checking, writing the manuscript, literature summarization, preparing presentations, generating graphics, coding assistance, or other productivity purposes shall NOT satisfy the mandatory AI research requirement.
5. During screening and the National Finals, teams must clearly explain:
   a. the specific AI technique/model used;
   b. why AI is appropriate for the problem;
   c. the data used by the AI component;
   d. how the model was developed, trained, adapted, or integrated;
   e. how its performance was evaluated;
   f. the role of AI within the overall system; and
   g. the limitations and ethical considerations associated with its use.

6. Research in which AI is merely mentioned or superficially added without a meaningful technical contribution may be declared non-responsive to the competition requirements.

V. RESEARCH AREAS

InnovateX 2026 shall be open to AI-enabled research within Electronics Engineering and related interdisciplinary applications.

Research areas may include, but are not limited to:

1. Communications, Networks and Signal Processing
   - intelligent wireless communications;
   - AI-assisted network optimization;
   - signal classification;
   - speech and audio processing;
   - intelligent antenna/RF applications;
   - network anomaly detection.
2. Embedded Systems, IoT, Robotics and Automation
   - intelligent IoT systems;

- edge AI and TinyML;
- autonomous systems;
- robotics;
- intelligent sensing;
- predictive maintenance;
- industrial automation.

3. Power, Energy and Sustainable Technologies
   - energy forecasting;
   - smart grids;
   - renewable-energy optimization;
   - intelligent energy management;
   - environmental monitoring;
   - climate and sustainability applications.
4. AI, Data Science and Emerging Applications
   - computer vision;
   - intelligent decision-support systems;
   - predictive analytics;
   - healthcare technologies;
   - assistive technologies;
   - smart agriculture;
   - smart cities;
   - disaster-risk reduction;
   - education technologies;
   - cybersecurity; and
   - other emerging AI-enabled engineering applications.

VI. COMPETITION STRUCTURE

InnovateX 2026 shall be conducted as a national undergraduate research competition consisting of two major stages:

Stage 1 – Preliminary Research Paper Screening

Participating HEIs shall submit their official research entries through their respective IECEP Local/Regional Chapters.

All qualified research papers shall undergo blind or coded evaluation by a National Screening Panel using the prescribed screening criteria.
The Top Ten (10) qualified research entries shall advance to the National Finals.

Stage 2 – InnovateX 2026 National Finals
The Top Ten finalists shall present and defend their research before a National Panel of Judges during the:
IECEP National Students' Summit 2026
November 25, 2026
Sigtuna Hall, Tagaytay City, Cavite

The National Finals shall include:

- research presentation;
- prototype/system/simulation demonstration, where applicable; and
- question-and-answer/research defense.

VII. IMPORTANT DATES

Activity	Schedule
Deadline for Official Chapter Endorsement and Research Paper Submission	November 7, 2026
Preliminary Research Paper Screening	November 8–13, 2026
Announcement of Top 10 National Finalists	November 14, 2026
Submission of Final Presentation and Required Finalist Materials	November 20, 2026
InnovateX 2026 National Finals	November 25, 2026
Awarding and Recognition	November 25, 2026
Venue	Sigtuna Hall, Tagaytay City, Cavite

The Organizing Committee may adjust administrative deadlines when necessary. Any material modification shall be communicated to officially registered participants.

VIII. REGISTRATION AND OFFICIAL ENDORSEMENT

1. Each affiliated school/college/university may endorse one (1) official research team to InnovateX 2026.
2. Each research team shall consist of three (3) to five (5) student researchers and at least one (1) faculty research adviser.
3. All student researchers must be duly registered participants of the IECEP National Students' Summit 2026.
4. For purposes of these Guidelines, a duly registered participant refers to a participant who has paid the applicable registration fee for the National Students' Summit 2026.
5. The faculty adviser is not considered a competing member of the team.
6. Official entries shall be endorsed through the appropriate IECEP Local/Regional Chapter.
7. The official endorsement and research submission shall be received on or before November 7, 2026, through:
   jomercatipon.iecep@gmail.com

8. The email shall use the subject line:

NSS 2026 – INNOVATEX ENDORSEMENT – [IECEP LOCAL/REGIONAL CHAPTER]

Example:
NSS 2026 – INNOVATEX ENDORSEMENT – IECEP CAVITE CHAPTER

9. The submission shall include:
   a. accomplished Agreement and Official Entry Form;
   b. Research Paper in PDF format;

c. Intellectual Property and Research Integrity Declaration;
d. proof of payment of the applicable NSS 2026 registration fee for every student team member; and
e. other documents prescribed by the Organizing Committee.

IX. ELIGIBILITY OF RESEARCHERS

1. All student researchers must be bona fide BSECE students currently enrolled in the HEI represented.
2. All student researchers must be IECEP Student Members in good standing.
3. All student researchers shall come from the same HEI.
4. The research must be an undergraduate student research project.
5. Student members of the team must have made substantive contributions to the research.
6. Faculty advisers may provide research supervision, technical guidance, methodological consultation, and mentoring but shall not substitute for the students in the conduct and defense of the research.
7. The research may have been developed as an undergraduate thesis, capstone project, design project, institutional research project, or independently undertaken undergraduate research.
8. The research must not have been previously declared Champion in a national-level InnovateX competition.
9. Any material misrepresentation concerning eligibility, authorship, research ownership, or student contribution may constitute grounds for disqualification.

X. RESEARCH PAPER REQUIREMENTS

For purposes of uniform evaluation, all entries shall follow the InnovateX 2026 Research Competition Paper Format.

The paper shall contain the following:

1. Title of the Research
2. Abstract – brief overview of the problem, proposed solution, AI application, methodology, and major results.
3. Problem and Research Objectives – the problem being addressed, its significance, and the specific objectives of the research.
4. Proposed Solution and Innovation – description of the developed system, prototype, model, application, or solution and its innovative features.
5. AI Integration – description of the Artificial Intelligence/Machine Learning technique used, its purpose, and how it is integrated into the research or system.
6. Methodology and System Development – concise description of the research methodology, system/prototype development, data used, testing procedures, and implementation.
7. Results and Validation – presentation of the major findings, system performance, AI model performance, testing results, and other evidence demonstrating the effectiveness of the proposed solution.

8. Potential Impact and Sustainability – discussion of the research's potential application, beneficiaries, feasibility, scalability, sustainability, and/or societal, environmental, educational, or industrial impact.
9. Conclusion – major conclusions based on the results of the research.
10. References – relevant references and sources used in the study.

The research paper shall be submitted in PDF format using the official InnovateX 2026 Research Competition Paper Template to be provided by the Organizing Committee.

XI. AI METHODOLOGY AND VALIDATION REQUIREMENTS

The research paper and presentation should clearly explain:

1. what AI/ML approach was used;
2. how and why it was used in the research;
3. what data or inputs were used, where applicable;
4. how the AI component was tested or validated; and
5. what results demonstrate its effectiveness.

The appropriate validation method and performance measures shall depend on the nature of the research. Teams are not required to use a prescribed set of AI metrics when such metrics are not applicable to their study.

XII. RESPONSIBLE USE OF GENERATIVE AI IN RESEARCH

1. The responsible use of generative AI tools in the research process shall be permitted.
2. Generative AI may be used, where appropriate, for:
   a. brainstorming or ideation;
   b. coding assistance;
   c. debugging;
   d. language improvement;
   e. organization of information;
   f. preliminary exploration of concepts; and
   g. other legitimate research-support functions.
3. However, AI-generated material shall not replace the researchers' intellectual contribution, analysis, interpretation, validation, or defense of the research.
4. Teams remain fully responsible for the accuracy, originality, citations, methodology, code, analysis, results, and conclusions contained in their submission.
5. Teams shall verify AI-generated information before incorporating it into the research.
6. Fabricated references, fabricated data, fabricated results, or false claims generated through AI or otherwise shall constitute a serious research-integrity violation.
7. Where generative AI materially contributed to the preparation or development of the research, its use shall be transparently disclosed in an AI Use Disclosure Statement.
8. The disclosure should identify:
   a. AI tool used;
   b. purpose for which it was used; and
   c. extent of its contribution.

9. The use of AI shall not exempt teams from plagiarism, copyright, research-integrity, data-privacy, or intellectual-property requirements.

XIII. RESEARCH ETHICS AND INTEGRITY

1. All entries shall observe accepted principles of research integrity.
2. Fabrication, falsification, plagiarism, misrepresentation, or manipulation of research data shall be prohibited.
3. Research involving human participants, personal information, sensitive data, animals, or other activities requiring ethical or institutional clearance must have obtained the appropriate approval or authorization required by the team's institution.
4. Teams shall be responsible for compliance with applicable data-privacy requirements.
5. All sources, datasets, software, frameworks, pretrained models, APIs, libraries, and external materials used in the research shall be appropriately acknowledged.
6. The Organizing Committee may request supporting documentation when necessary to verify ethical or research-integrity compliance.
7. Confirmed serious research-integrity violations shall constitute grounds for disqualification.

XIV. PRELIMINARY RESEARCH PAPER SCREENING

All eligible submissions shall undergo preliminary screening by a National Screening Panel.

Screening Criteria

Criterion	Weight
AI Integration and Technical Relevance	25%
Originality and Innovation	20%
Technical and Methodological Rigor	25%
Potential Impact and Sustainability	20%
Quality and Clarity of Research Paper	10%
TOTAL	100%

AI Integration and Technical Relevance – 25%

Evaluates whether AI is meaningfully integrated into the research, technically justified, and essential or substantially contributory to the proposed solution.

Originality and Innovation – 20%

Evaluates novelty of the research problem, approach, system, methodology, application, or integration of existing technologies.

Technical and Methodological Rigor – 25%

Evaluates appropriateness of research design, data collection, AI methodology, system development, experimentation, validation, analysis, and interpretation.

Potential Impact and Sustainability – 20%

Evaluates relevance to real-world problems, potential beneficiaries, scalability, sustainability, applicability, and possible societal, environmental, educational, economic, or industrial impact.

Quality and Clarity of Research Paper – 10%

Evaluates organization, coherence, technical writing, presentation of evidence, appropriate citation, and overall quality of the manuscript.

The Top Ten (10) highest-ranked qualified entries shall advance to the InnovateX 2026 National Finals.

XV. NATIONAL FINALS – PRESENTATION AND DEFENSE

1. The Top Ten (10) research teams shall participate in the live National Finals on November 25, 2026.
2. At least three (3) officially registered student researchers from each finalist team must be physically present during the National Finals.
3. The faculty research adviser is encouraged to be present but shall not participate in answering questions during the research defense.
4. Each finalist team shall be allotted:
   Research Presentation – 6 minutes
   Prototype/System Demonstration – 4 minutes
   Question and Answer / Research Defense – 5 minutes
   Total maximum time per finalist: 15 minutes
5. The presentation may be delivered by one or more student researchers.
6. During the Q&A, any officially registered student researcher may respond.
7. The adviser, coach, faculty member, or audience shall not assist the team during the presentation and defense.
8. All presentations and research defenses shall be conducted in English.
9. The presentation shall clearly explain:
   a. research problem;
   b. objectives;
   c. proposed solution/system;
   d. AI methodology;
   e. data and validation;
   f. results;
   g. prototype/system operation;
   h. innovation;
   i. limitations; and
   j. potential impact.

XVI. NATIONAL FINALS JUDGING CRITERIA

Criterion	Weight
Technical Rigor and AI Implementation	30%
Innovation and Research Contribution	25%
Results, Validation and Feasibility	20%
Potential Impact and Sustainability	15%
Presentation and Research Defense	10%
TOTAL	100%

Technical Rigor and AI Implementation – 30%

Soundness of methodology, appropriateness of AI model/algorithm, system integration, technical design, data handling, and overall engineering quality.
Innovation and Research Contribution – 25%
Originality, novelty, ingenuity, and contribution of the research to Electronics Engineering, technology, or its field of application.
Results, Validation and Feasibility – 20%
Quality of experimental results, model/system validation, appropriateness of metrics, evidence supporting conclusions, reliability, and feasibility of implementation.
Potential Impact and Sustainability – 15%
Potential social, environmental, industrial, educational, economic, or technological value; scalability; applicability; and sustainability.
Presentation and Research Defense – 10%
Clarity and organization of presentation, command of the research, ability to explain technical concepts, quality of responses, and ability to defend methodological and design decisions.

XVII. DETERMINATION OF FINAL RANKING

1. The National Finals shall constitute the basis for determining the Champion, 1st Runner-Up, and 2nd Runner-Up.
2. Preliminary screening scores shall be used only to determine the Top Ten National Finalists and shall not be carried over to the National Finals.
3. Each judge shall independently evaluate every finalist using the prescribed National Finals criteria.
4. The final score of each team shall be the average of the scores given by all National Finals judges.
5. The three teams obtaining the highest final scores shall be declared:
   CHAMPION
   1ST RUNNER-UP
   2ND RUNNER-UP

XVIII. TIE-BREAKING PROCEDURE

In case of a tie affecting the Top Three rankings, the tie shall be resolved successively using the higher score in:

1. Technical Rigor and AI Implementation;
2. Innovation and Research Contribution;
3. Results, Validation and Feasibility;
4. Potential Impact and Sustainability; and
5. Presentation and Research Defense.

If a tie remains, the Panel of Judges shall deliberate and determine the final ranking.

XIX. PANEL OF JUDGES

1. The Preliminary Screening Panel and National Finals Panel may be composed of different judges.
2. The National Finals Panel shall consist of a Chairperson and at least three (3) judges, or such number as may be determined by the Organizing Committee.

3. Judges should possess relevant expertise in one or more of the following:
    - Electronics Engineering;
    - Artificial Intelligence/Machine Learning;
    - Data Science;
    - IoT and Embedded Systems;
    - Communications;
    - Robotics and Automation;
    - Research and Development;
    - Innovation and Technology Commercialization;
    - Industry; or
    - related fields.
4. Judges shall disclose actual or potential conflicts of interest.
5. A judge with a material conflict involving a finalist shall inhibit from evaluating that entry when appropriate.
6. The decision of the Panel of Judges concerning substantive research evaluation shall be final.

XX. INTELLECTUAL PROPERTY RIGHTS

1. All research outputs, prototypes, software, systems, models, designs, and other intellectual property presented in InnovateX 2026 shall remain the property of the respective authors/researchers and/or their institutions, subject to applicable institutional policies and laws.
2. IECEP, Inc. shall not acquire ownership of any research or innovation merely by reason of its submission to the competition.
3. Teams shall ensure that their research does not infringe existing copyrights, patents, trademarks, trade secrets, licenses, or other intellectual-property rights.
4. Teams shall appropriately acknowledge third-party technologies, datasets, software, libraries, pretrained AI models, APIs, and other resources.
5. Teams are encouraged to coordinate with their respective institutions regarding appropriate intellectual-property protection before publicly disclosing potentially patentable innovations.
6. IECEP, Inc. may document and promote the competition and its participants for educational and organizational purposes, subject to reasonable protection of confidential and proprietary research information.

XXI. CONFIDENTIALITY AND PROTECTION OF UNPUBLISHED RESEARCH

1. Finalist teams shall identify confidential or proprietary portions of their research before the National Finals.
2. Judges, technical evaluators, and members of the Organizing Committee who receive non-public research materials may be required to execute an appropriate confidentiality undertaking.
3. Teams should not disclose patent-sensitive, trade-secret, personally identifiable, or other highly confidential information during a public presentation unless appropriate protection has already been secured.

4. The public nature of the National Finals shall be communicated to finalists before presentation.
5. Where appropriate, detailed confidential technical information may be provided separately to the judges subject to appropriate confidentiality arrangements.

XXII. CLARIFICATIONS AND PROTESTS

1. Questions concerning eligibility, submission requirements, research integrity, AI compliance, intellectual property, and administrative matters shall be directed to the Organizing Committee.
2. Participants and advisers shall not communicate directly with members of the Panel of Judges concerning scores or evaluation during the competition.
3. Matters concerning substantive research evaluation shall be within the authority of the Panel of Judges.
4. Administrative protests shall be submitted through the official communication channel within the period prescribed by the Organizing Committee.
5. The decision of the appropriate Organizing Committee or Panel of Judges within its respective area of responsibility shall be final.

XXIII. AWARDS AND RECOGNITION

1. The three highest-ranking research teams shall be recognized as:
   CHAMPION
   1ST RUNNER-UP
   2ND RUNNER-UP
2. Each student researcher of the winning teams shall receive a Certificate of Recognition and medal.
3. Each winning HEI shall receive a Certificate of Recognition.
4. The Champion team may receive a Plaque of Recognition, subject to the awards approved by IECEP, Inc.
5. Prizes may be awarded to the Top Three teams as determined by IECEP, Inc. and the National Students' Summit 2026 Organizing Committee.
6. Each student member of the Top Ten National Finalist teams who completes the competition shall receive an individual Certificate of Participation.
7. Each HEI represented in the National Finals shall likewise receive a Certificate of Participation.
8. Certificates of Recognition may also be awarded for special distinctions, subject to approval, such as:
   - Best AI Application
   - Best Research Innovation
   - Best Research Presentation
   - Best Prototype/System Demonstration
   - Research with Highest Potential Impact
9. Winners shall be formally recognized during the IECEP National Students' Summit 2026 on November 25, 2026, at Sigtuna Hall, Tagaytay City, Cavite.

XXIV. GENERAL PROVISIONS

1. Travel, accommodation, meals, prototype transportation, equipment, materials, and other expenses associated with participation shall be shouldered by the participating institution and/or participants unless otherwise announced.
2. Finalists shall be responsible for ensuring the operability of their prototype, software, simulation, presentation, and other required materials.
3. The Organizing Committee shall provide reasonable presentation facilities subject to venue availability.
4. IECEP, Inc. shall not be responsible for equipment failure, damaged prototypes, corrupted files, unavailable internet services, or other technical problems attributable to the participating team.
5. IECEP, Inc. reserves the right to modify schedules, technical arrangements, submission procedures, and other operational provisions when necessary for the fair, safe, and orderly conduct of the competition.
6. Any material modification shall be communicated to officially registered teams before implementation whenever practicable.
7. Matters not specifically covered by these Guidelines shall be resolved by the National Students' Summit 2026 Organizing Committee, in consultation with the Screening Panel or National Panel of Judges when substantive research evaluation is involved.
8. Participation in InnovateX 2026 – AI-Enabled Undergraduate Research Challenge shall constitute acceptance of these Rules and Regulations.

ENGR. JOMER V. CATIPON
Chair, National Students' Summit 2026
Chair, Education and Student Affairs Committee
Vice President for Education
Institute of Electronics Engineers of the Philippines (IECEP), Inc.

INNOVATEX 2026
AI-ENABLED UNDERGRADUATE RESEARCH CHALLENGE

AGREEMENT AND OFFICIAL ENTRY FORM

IECEP Local/Regional Chapter:	
Name of HEI:	
Date:	

I. AGREEMENT

This is to certify that the participating team, its coach/adviser, and the institution represented have read, understood, and agreed to abide by the Rules and Regulations of the **INNOVATEX 2026 -** AI-ENABLED UNDERGRADUATE RESEARCH CHALLENGE under the IECEP National Students' Summit 2026.

Name of Institute/College/University	Authorized Institutional Representative
	Signature over Printed Name
	Position/Designation:

II. OFFICIAL TEAM MEMBERS

The following students are hereby identified as the official members of the team representing the above-named institution:

1×1 Photo	Team Member Information	Signature
	Name: Year Level: Contact No.: Email:	
	Name: Year Level: Contact No.: Email:	
	Name: Year Level: Contact No.: Email:	

III. INSTITUTIONAL CERTIFICATION

We hereby certify that the students listed above are bona fide Bachelor of Science in Electronics Engineering (BSECE) students currently enrolled during the academic term covering the National Students' Summit 2026 at the institution indicated in this form.

We further certify that the information provided in this Official Entry Form is true and correct.

Coach	Adviser / Authorized Institutional Representative
Signature over Printed Name	Signature over Printed Name
Contact No.:	Position:
Email:	Email:

IV. IECEP LOCAL/REGIONAL CHAPTER ENDORSEMENT

We hereby officially endorse the above-named team as a qualified representative of the indicated school/college/university to the **INNOVATEX 2026 -** AI-ENABLED UNDERGRADUATE RESEARCH CHALLENGE under the IECEP National Students' Summit 2026.

We further certify that:

1. the school/college/university represented is duly affiliated with IECEP through the appropriate Local/Regional Chapter;
2. all officially listed team members are IECEP Student Members in good standing; and
3. the team members satisfy the eligibility requirements prescribed in the official competition guidelines.

Vice Governor for Education	Chapter Governor
Signature over Printed Name	Signature over Printed Name
Contact No.:	Contact No.:
Email:	Email:
Date:	Date:

V. REQUIRED ATTACHMENTS

The following shall accompany this Official Entry Form:

☐ Proof of payment of the applicable National Students' Summit 2026 registration fee for each officially listed team member

☐ Group photo of the official team

☐ Other eligibility documents, if required by the National Students' Summit 2026 Organizing Committee

VI. OFFICIAL TEAM PHOTO

Please attach or insert a recent group photo of the three (3) official team members below.

VII. SUBMISSION

The accomplished Agreement and Official Entry Form, together with the required attachments, shall be submitted by the respective IECEP Local/Regional Chapter on or before:
Deadline: November 7, 2026
Email: jomercatipon.iecep@gmail.com

Email Subject: NSS 2026 – INNOVATEX ENDORSEMENT – [IECEP LOCAL/REGIONAL CHAPTER]
Example: NSS 2026 – INNOVATEX ENDORSEMENT – IECEP CAVITE CHAPTER
